Conclusion

$$\int_0^1 dy \int_0^1 f dx + \int_{1/\sqrt{2}}^1 dy \int_0^1$$

Whoa!

This can be the part of the presentation where you introduce yourself, write your email...

$$\int_0^{1-x} \int_0^{10(x+3y)} \int_0^x x^2 dz =$$

$$\frac{3, x=5}{2+4y^2} \frac{1}{x^2+4y^2}$$

$$V: z=10(x+3y), x+y+z=10$$

$$x=0, y=0, z=0$$

01

Overview

$\int f dy$

Intro

- What is it?
 - Web app with multiple calculator and math tools inplace
- Pick a mode from the sidebar and get results
- Goal:
 - Was to turn a python colab code into a live app anyone can use
- Coded in Python
- Stored project using a Github repository

$$x^2 dy =$$

$$= \int_0^1 dx$$

Features

$$dydz =$$

- Features

- Basic: add, subtract, multiply or divide two numbers
- Scientific: trigonometric functions, radicals, exponents, logs, factorial, GCF and LCM
- Financial: simple and compound interest (in Naira)
- Plot: graph a function you type, e.g. x^{**2} , $\text{sqrt}(x)$
- Circle: circumference and area from a radius or diameter
- Image viewer: Upload and display any PNG/JPG

$$y = \frac{1}{x}$$

$$V: z = 10(x + 3y), \\ x = 0, y = 0, z =$$

$$\int_0^{1-x} \int_0^{10(x+3y)} \int_0^x x^2 dz =$$

$$\frac{3, x=5}{2+4y^2}$$

$$V: z=10(x+3y), x+y+z=0, x=0, y=0, z=0$$

02 Process

$$= \int_0^1$$

Process of Deployment

$$\int_0^{1-x} \int_0^{10(x+3y)} x^2 dz =$$

$$\frac{3, x=5}{2+4y^2}$$

$$V: z=10(x+3y), x+y+z=0, x=0, y=0, z=0$$

03 Demo

$$= \int_0^1$$

$$\int_0^{1-x} \int_0^{10(x+3y)} \int_0^x x^2 dz =$$

$$\frac{3, x=5}{2+4y^2} \frac{1}{x^2+4y^2}$$

$$V: z=10(x+3y), x+y+z=10$$

$$x=0, y=0, z=0$$

04

Challenges and Improvemnents

$$= \int_0^1$$

$$V: \begin{matrix} z = \\ x = \end{matrix}$$

Challenges and Improvements

Challenges & Learning

- Colab codes use `print()` and `input()` while web apps like streamlit are more event based and the script is rerun on every click
- Accounting for bad input and computational error e.g. dividing by zero, negative square roots, invalid logs
- Keeping my deployment requirements in a .txt file

Improvements

- Add calculator history
- Light/Dark Mode
- More modes
- Unit conversions
- Equation sheet
- Learner mode

$$y = \sin x$$

$$y = \cos x$$

$$S = 2\pi R$$

Thanks!

$$2\sqrt{y^2 - x^2}$$

$$2\sqrt{y^2 - x^2}$$

Alternative resources

Here's an assortment of alternative resources whose style fits that of this template:

Vectors

- Scientific formulas on chalkboard

$$V = \int_1^1 dy \int_5^5 dx \int_4^{4+\sqrt{9x^2+4y^2}} dz =$$

$$\pi = 3,141592$$

$$\begin{aligned} x &= r \cos \varphi \\ y &= r \sin \varphi \end{aligned}$$

$$\begin{aligned} y^2 - 8y + x^2 &= 0 \\ y^2 - 10y + x^2 &= 0 \\ y &= \frac{x}{\sqrt{3}}, y = \sqrt{3}x \end{aligned}$$

$$= 9 \left(4 - \frac{1}{2} \sin 2\varphi \right) d\varphi = 9 \left(\frac{\pi}{3} - \frac{\pi}{6} - \frac{1}{2} \left(\sin \frac{2\pi}{3} - \sin \frac{\pi}{3} \right) \right) = \frac{3\pi}{2}$$

$$\int_0^{10(x+3y)} x^2 dz =$$
